PROJECTS

Extraction of texts from webpage(2018) —

Used HTML+CSS, Python and OCR technology to scrape the result of the students from the university result web page and generated MS-excel sheet automatically filled with the scraped details of the result from the web page.

Organ donation with Blockchain technology(2020-21) —

Using Node.js, JavaScript, Blockchain technology to store the patient's, donor's and hospital's data to make the required matches for organ donation between donor and receiver with the help of the hospital.

RESEARCH PAPER

Creating Organ Donation System with Blockchain Technology

Paper has been accepted in two different Scopus Indexed journals (IFERP & EJMCM) and soon it will get published in EJMCM.
